

UPDATE

CYBER SECURITY ACTIVITY AT CJH NETWORK

WHAT IS HAPPENING?

IBM Assessments

CCAT

IBM have now moved their assessments over to SHL. (www.shl.com) For us, this is a positive move. The Commercial Cyber Aptitude (CCAT) has already been put up on their platform and will be available for demonstrations next week. There were plans to develop customized versions of CCAT for Health, Students and High Potential CISO candidates. This is all under discussion again.

Immersive Labs

Please see links to Immersive labs Lite Training Academy and Video below where you can log on and avail of a trial seat. Feel free to share this with any of your colleagues and if you need any further assistance let us know.
