

# Successful Remote Working

Planning + people + process  
improvement

.SHL.

## WORKING REMOTELY CAN WORK FOR YOUR ORGANISATION.

Your employees work differently when they work remotely.

## INTRODUCING SHL'S REMOTEWORQ

SHL's RemoteWorkQ assesses remote work readiness through a short, targeted questionnaire.

## SHL VIRTUAL SOLUTIONS

The Solutions include:

- Live Video Interview
- Video Interview
- Coding Interview

## VIRTUAL RECRUITMENT SOLUTIONS

Organisations still need to conduct business, including talent acquisition and management and these virtual solutions will allow them to do this with ease. With limited travel and working from home the Virtual Solutions will provide the capability to screen high volumes of candidates, conduct live and recorded interviews and advance development plans. [Learn more here about Video Interview](#)

## REMOTEWORQ

Working remotely requires support that goes beyond a secure laptop and a good chair. In this crisis period, where working outside the office has been forced on many organisations, we can help you ensure that your employees are ready to perform. CJHNetwork is delighted to introduce the RemoteWorkQ assessment from SHL. This is the first assessment designed to help leaders and their people adapt to the remote, working environment.

This has become and for many will be a larger part of the future of organization life. SHL's RemoteWorkQ identifies strengths and areas for development to support this way of working. This will enable you to plan, prepare and develop for remote work success. [See Sample Remote Work Q Report Here](#)
